

RAFFLES AGUSTINUS SUPIT

Salatiga, Indonesia | +62 89542963332 | rafflessupit25@gmail.com |

Informatics Engineering graduate with a GPA of 3.81 and strong interest in backend and full-stack development. Experienced in building web applications using Laravel, Flask, Spring and JavaScript, with solid understanding of software engineering principles, RESTful APIs, relational and nonrelational databases. Passionate about solving real world problems through scalable software solutions and continuous learning.

EDUCATION

Universitas Kristen Satya Wacana - Salatiga Jawa Tengah

Informatics Engineering | GPA: 3.81 / 4.00

Specialization - Software Engineering

August 2022 - June 2026

EXPERIENCES

IT Business Integration Intern – PT Sumber Alfaria Trijaya, Tbk.

September 2025 - August 2026

- Participated in the migration of the Master Merchant Cash application from Oracle Forms to the Internal Framework.
- Developed backend APIs and business logic using Python and MongoDB for CRUD operations, validation, and audit logging.
- Implemented frontend functionality using JavaScript, including dynamic forms, custom buttons, and searchable data tables.
- Performed debugging, testing, and application enhancements to improve system stability and user experience.

Teaching Assistant – FTI UKSW Salatiga

January 2024 - June 2025

- Assisting students in grasping key concepts and practical applications in subjects such as Programming Fundamentals, Algorithms Structures Data, Network Programming Basics, and Artificial Intelligence.
- Offering both one-on-one and group mentorship to clarify programming and computational theories.
- Supporting faculty in preparing course materials, evaluating assignments and exams, and conducting tutorial sessions to enhance student comprehension.

FIT International Competition 2025 - Committee

March 2025 - August 2025

- Manage the planning and execution of national and international coding competitions.
- Developed a comprehensive event rundown, ensuring smooth organization and seamless execution.
- Collaborate with the event team, judges, participants, and sponsors to ensure seamless event operations.

PROJECTS

NewsHub – News Portal Web Application

- Developed a microservices-based news portal consisting of independent services for authentication, news management, categories, and user administration.
- Built RESTful APIs using Laravel and PHP, implementing CRUD operations, authentication, request validation, and database integration with PostgreSQL.
- Integrated frontend and backend services using Axios through an API Gateway to enable seamless communication between microservices.
- Designed and managed relational database schemas in PostgreSQL, ensuring data consistency and efficient query performance.

E-Commerce Platform

- Built a microservices-based e-commerce backend supporting end-to-end business flows from product browsing to order completion.
- Designed a scalable and maintainable architecture using Spring Boot, API Gateway, and service discovery for distributed services.
- Implemented secure authentication and authorization with Spring Security and JWT.
- Integrated multiple backend services to enable smooth order, payment, and delivery processes.

ADDITIONAL

Languages: Indonesian (Native), English (Working Proficiency).

Technical Skills:

- **Programming Languages:** Python, JavaScript, PHP, Java
- **Database Management:** MySQL, MongoDB, PostgreSQL
- **Cloud & DevOps:**
 - **Cloud Services:** Google Cloud Run (serverless deployment)
 - **Version Control:** Git, GitHub

Soft Skills: Effective Communication, Event Coordination, Problem Solving, Adaptability, Team Collaboration.
